**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

We claim:

1. (Currently amended) A handheld mobile communications device that comprises  
a support structure;  
~~radio signal processing circuitry positioned on the support structure and configured to receive and transmit radio signals;~~  
~~audio signal processing circuitry positioned on the support structure and operatively connected to the radio signal processing circuitry; and~~  
~~image processing circuitry~~ a camera device positioned on the support structure and operatively connected to the ~~radio signal processing circuitry~~ mobile communications device; ~~wherein and~~  
a printing mechanism is detachably mountable on the support structure ~~to be and~~ operatively connected to the ~~image processing circuitry~~ camera device ~~to for printing images generated by the image processing circuitry~~ camera device.
2. (Original) A communications device as claimed in claim 1, in which the printing mechanism includes a pagewidth printhead and an ink distribution unit mounted on the printhead to supply ink to the printhead.
3. (Original) A communications device as claimed in claim 2, in which the printhead includes a printhead chip that spans a print media pathway, the printhead chip defining a plurality of ink inlets for the supply of ink to the printhead chip.
4. (Original) A communications device as claimed in claim 3, in which the ink distribution unit defines a number of discrete ink supply chambers and a plurality of ink pathways interposed between the ink supply chambers and said ink inlets, the ink pathways converging towards the ink inlets so that each ink inlet is supplied with ink from a respective ink pathway.
5. – 7. (Cancelled)
